

The Shadow Knows

Who knows what evil lurks in the hearts of men? The Shadow knows!

Fifth Edition – February 2022

There has been an explosion of new nano-devices found in the Covid-19 vaccine(s). Most of these have been found in New Zealand, Spain, and Germany. They are not limited to those countries. There are also new Graphene Oxide “shapes” some of which are easy to guess as to function. Some of the images shown as nano-devices are graphene but have been lumped in for convenience.

Understand this work is not once and done. This is a moving target where evil is stepping up their game as they start to understand they are not obtaining their goals. Expect false victories followed by renewed attacks. Expect a rapidly increasing rate of vax deaths to be blamed on the unvaccinated or new variants or anything except for the vaccine and calls for more vaccines. Assume the Georgia Guide Stones document part of their goals along with world domination.

Graphics are numbered left to right, top to bottom, therefore 1,1 refers to the graphic that looks like a pistol. The numbers 6,1 refer to the image that looks like a knife blade.

These rates will “remove” the problem and while there are generalized rates that should capture all of these new nano-devices this is genocide and a belt and suspenders approach is justified. This newsletter is unfortunately only useful to Radionics operators, a very small community of people worldwide.

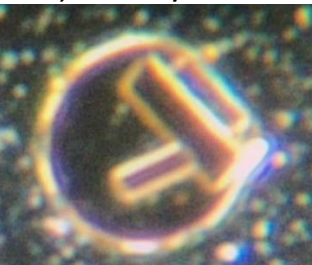

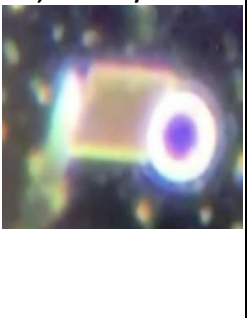

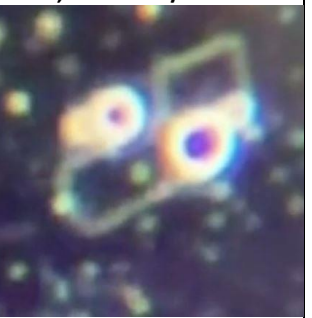

Broadcast – Minimum overnight.

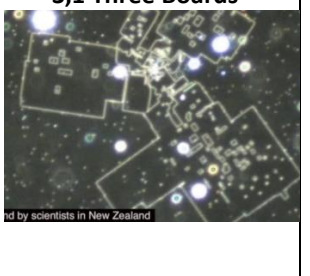

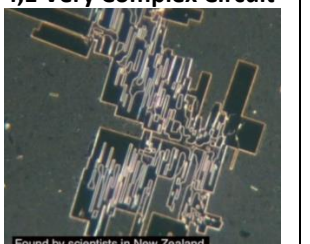

Potentized – Dowse for strength and usage of final product.

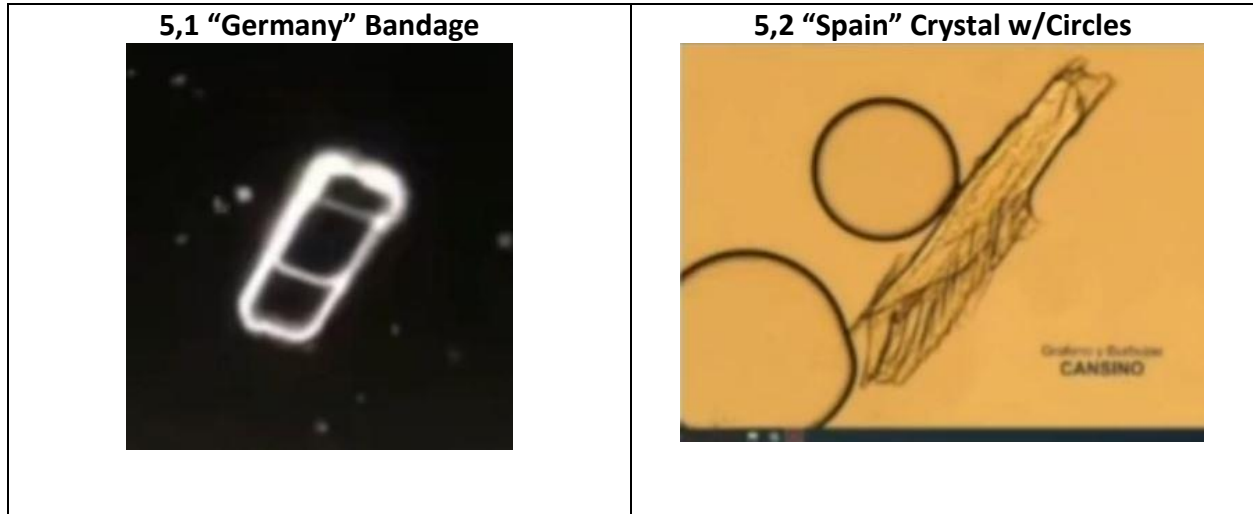

Absorption via Contact – Water– overnight for drink bottle, Jewelry- 12 hours/day

Household Method – Potentize incoming water main via laser

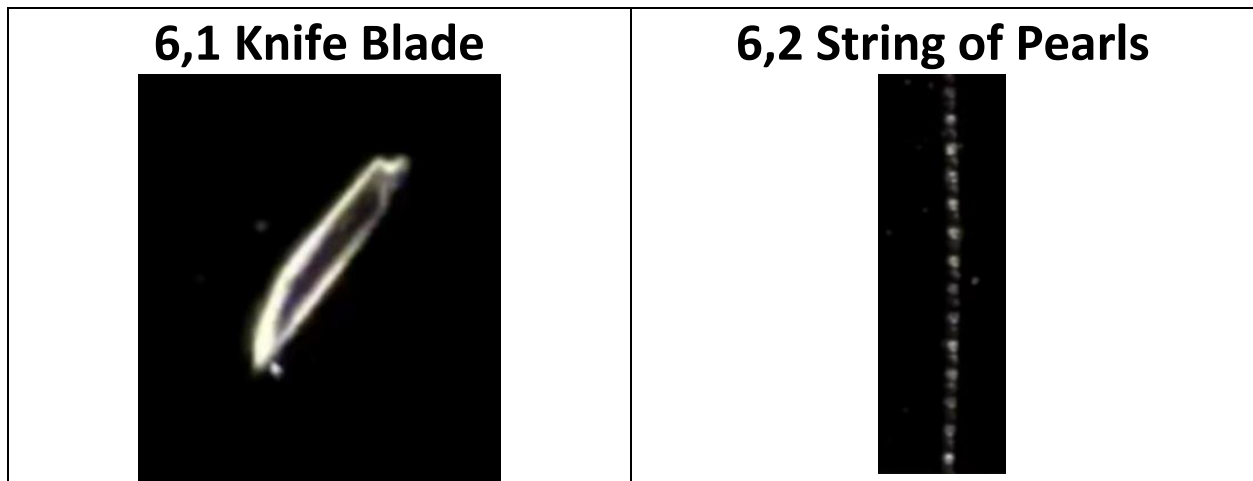

“New Zealand” New Finds

Dark Winter – Smallpox (Part 2)

The following information is provided as historical entertainment and not as medical advice.

Reading rare and out of print medical books from the 1800s and early 1900s often provides insights and sometimes cures that are generally unknown. Recently I read the book, “Safe, Speedy, and Certain CURE for SMALL-POX” by Charles Rose, published 1877, available from amazon.com. The discoverer of the formula was Mr. Thomas Rose of Dorking, England. The method in the book documented over 3000 full cures with only 1 loss of a child with the comorbidity of whooping cough. This method was also tested on other Pox variants with success. Chemical names have been converted into modern names.

Cream of Tartar, $\frac{3}{4}$ Ounce (Baking isle in market)
Rhubarb, 12 grains (0.78 grams) (Fresh veg or in cans. Used in pies)
Water, 1 pint
Dissolve in the water

Repeat as needed

Half pint in early-stage adult, again every three or four hours.
Advanced cases apply hot water bottle to bottom of feet. Provide cold drinks only. No baked goods or meat or fever inducing foods unless necessary until healthy.
